

"I approached Dom to undertake a major project that I had been considering for a few years which was to totally remodel my flat at Canary Wharf. I had confidence in Dom's experience and ability to do the job from the outset. It hadn't totally planned the scheme of works when I called Dom as I had reached a bit of an impasse with it. Dom and I met a couple of times to talk it over and he was able to come back with solutions which worked for aesthetically and financially. I am someone who is very focussed on getting something finished - often sooner rather than perfect and I am really glad that Dom really thought the whole project through and phasing of works. He had a very small space and a difficult 'canvas' on which to work. Dom told me from the outset how long the work would take and he was spot on. Both he and his colleague worked really hard to keep to the agreed deadline. I had to move out of the flat whilst the work was being done and Dom kept in constant contact by phone and emailing pictures through and I visited the site every few days but felt confident to let them just get on with it. The finished flat is exactly what I wanted. I am absolutely thrilled with it. I wouldn't hesitate in engaging Dom's services again."
