

I came to know about Dominic by seeing his advertisement on Gumtree.com. The work was to fix my broken wooden fence, tucked in between concrete posts. I wanted to replace wooden panels with concrete gravel boards. Though it sounds easy concrete gravel boards are heavy of which about 15 of them needed cutting to fit the corners. There was some wooden post at the corner which needed replacement with concrete post.

The person I normally call for these kind of job was on holiday. That's the reason I was looking around for someone reliable and competitive which ended me searching on the internet as well. Initially I was a little reluctant to reply for an advertisement on Gumtree (which is a free website) but I decided to give it a go.

I was really impressed by Dominic's professionalism from day one. Dominic was on time for viewing fence work to give me the estimate for the work. The price he quoted was reasonable and his communication was great.

Dominic was on time on the day of work and he brought all the required tools in his van. He is not just some one who does the job but a man full of ideas. He has suggested me some great ideas which saved me both time and money. He has finished the work on time and with in budget. He did not compromise on the quality at any stage. Seeing the workmanship even my neighbours commented about it and I have given Dominic's contact details to them already.

Over all I am very impressed by Dominic's dealings and is more than happy to engage him for future works.

M Kumar, East London.
